

MOHAMMED ABD ALATI

Full-Stack Developer

Cairo-Egypt | +201062476675 | Mo7.dawly@gmail.com | [linkedin.com/in/mohammed-ati](https://www.linkedin.com/in/mohammed-ati) | github.com/Mo7Ati

SUMMARY

Full Stack Developer proficient in **Laravel and React**, with a specialized focus on building modular backend services and dynamic, state-managed frontends. Experienced in architecting **RESTful APIs** and complex **MySQL** database schemas, with a strong emphasis on **performance optimization** and efficient data handling. Beyond core development, I bring a solid foundation in **Information Security** and a commitment to **clean code (SOLID principles)**, ensuring the delivery of secure, maintainable, and scalable applications that meet modern industry standards.

EXPERIENCE

Freelance Backend Developer

Jun 2025 – Jan 2026

Doomz Platform

- Architected and shipped the full backend for multiple client-facing Laravel applications, owning the lifecycle from database design through API deployment and production debugging
- Built dynamic admin dashboards and a custom CMS using Filament, enabling non-technical clients to manage their own content and significantly reducing turnaround time on site updates
- Implemented end-to-end authentication flows using Laravel Sanctum and JWT, and integrated third-party APIs for payments and push notifications, handling edge cases like token refresh and webhook verification
- Improved page load times and API response speeds through Eloquent query optimization, eager loading, Redis caching, and clean MVC architecture patterns

EDUCATION

Al-Azhar University

Bachelor of Computer Systems Engineering

Gaza, Palestine

Sep 2022 – Present

PROJECT EXPERIENCE

Multi-Vendor E-Commerce Platform

2025

Laravel, Inertia.js, React.js, Next.js, TypeScript, MySQL, Filepond, Stripe.

- Built Admin and Store dashboards using Laravel Starter Kit with React and Inertia.js, delivering SPA-like interfaces.
- Engineered scalable REST APIs with Laravel for the customer-facing storefront, handling products, orders, transactions, and authentication (Sanctum) within a multivendor architecture.
- Developed a Next.js (TypeScript, Tailwind CSS, shadcn/ui) frontend integrated with Laravel REST APIs.
- Deployed and maintained a production-grade full-stack application on Vercel (Next.js) and DigitalOcean (Laravel Forge).

Real-Time Messenger Web System

2025

Laravel, React.js, TypeScript, shadcn/ui, Laravel Verber, Laravel Echo, Broadcasting, WebSockets

- Built real-time communication using Laravel Verber, and Laravel Echo, enabling live messaging, typing indicators, presence status, and instant UI updates.
- Created RESTful APIs using Laravel, implementing core messaging logic for conversations, contacts, media sharing, and authentication in a real-time chat system.
- Improved a React interface supporting 1–1 and group chats, contact management, media sharing, and state synchronization.

Marketplace Operations Platform

2026

Laravel, Filament, Laravel Modules, Sanctum, MySQL, REST APIs

- Expanded Admin and Store dashboards using Filament and its ecosystem of community plugins, delivering scalable, role-based management interfaces for a complex Marketplace platform.
- Architected a modular Laravel backend exposing REST APIs for the customer-facing application, supporting multi-branch stores, complex order workflows, and scalable business logic.

Marketplace Mobile Application

2026

React Native (Expo), TypeScript, React Query, REST APIs

- Constructed a high-performance React Native (Expo) mobile application, delivering a seamless customer experience with real-time data synchronization, optimized API interactions, and scalable UI architecture.
- Rendered backend-managed home page sections dynamically in the React Native app.

TECHNICAL SKILLS

- **Backend:** PHP, Laravel, RESTful APIs, Filament, Laravel (Sanctum , Fortify) , Spatie (Permission, Media, Translatable)
- **Frontend:** React.js, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Ant Design, Inertia.js, Zustand, React Query .
- **Databases:** MySQL, SQLite.
- **Tools:** Git, GitHub, Docker, Laravel Verber , Stripe , Laravel Forge, Laravel Cloud, Laravel Nightwatch, DigitalOcean, Vercel
